Accepted Patent Applications

এতদ্বারা জানানো যাইতেছে যে, নিম্নে বাম পার্শ্বে উল্লিখিত যে কোন পেটেন্ট আবেদন পত্র সম্পর্কীয় উদ্ভাবনের জন্য পেটেন্ট মঞ্জুরীর বিরুদ্ধে যে সকল ব্যক্তি বিরোধিতা করিতে ইচ্ছুক তাঁহার এই গেজেট প্রকাশের তারিখ হইতে চার মাস সময় সীমার মধ্যে যে কোন সময় পেটেন্ট, ডিজাইন ও ট্রেডমার্কস অধিদপ্তর, (পেটেন্ট ও ডিজাইন উইং), শিল্প মন্ত্রণালয়, (৬ষ্ঠ তলা) ৯১, মতিঝিল বা/এ, ঢাকা-১০০০, বাংলাদেশ এই ঠিকানায় ১৯৩৩ ইং সনের পেটেন্ট ও ডিজাইন বিধিমালা-১৯৩৩ অনুযায়ী ৬ নং নির্দিষ্ট ফরমে বিরোধিতা নোটিশ দাখিল করিতে পারিবেন।

নিম্নে ডান পার্শ্বে প্রদর্শিত সাত অংক বিশিষ্ট সংখ্যাগুলি পুনর্জা বিশেষত্বনামা গৃহীত হইবার পর পেটেন্ট নম্বর প্রদান করা হইয়াছে এবং এই ক্রমিক সংখ্যা অনুসারে বিনির্দেশ মুদ্রণ করা হইবে এবং পরবর্তী কার্যক্রম গ্রহন করা হইবে।

গৃহীত পেটেন্ট দরখাস্ত সমূহের সাময়িক (যদি থাকে) ও পূর্ণাঙ্গ বিশেষত্বনামা জনসাধারণের পরিদর্শনের জন্য অফিস চলাকালীন সময়ে অত্র অধিদপ্তরে প্রদর্শিত হয়। যে কোন আবেদনকারীর প্রয়োজনে টাইপ-রাইটারে মুদ্রিত বিশেষত্বনামা প্রত্যায়িত প্রতিলিপি সরবরাহ করা যাইতে পারে যদি তিনি ২৯ নং ফরমে নির্দিষ্ট ফি সহ আবেদন দাখিল করেন এবং বিশেষত্বনামা টাইপ করিবার জন্য নির্দিষ্ট ফি পরিশোধ করেন।

লঘুবন্ধনীর মধ্যে প্রদর্শিত তারিখ ১৯১১ ইং সনের পেটেন্ট ও ডিজাইন আইনের ৭৮ক ধারা/প্যারিস কনভেনশনের বিধান অনুযায়ী অগ্রাধিকার তারিখ রূপে দাবী করা হইতেছে এবং যে দেশে দরখাস্তটি প্রথম দাখিল করা হইয়াছে সেই দেশের নাম তৎসঙ্গে উল্লিখিত হইয়াছে।

Notice is hereby given that all persons interested in opposing the grant of patent on any of the application referred to below may at any time within four months from the date this Gazette, give notice at the Department of Patents, Designs & Trademarks, (Patent & Design Wing), Ministry of Industries (5th Floor), 91, Motijheel C/A, Dhaka-1000, Bangladesh in the prescribed form-6 of the Patents and Designs Rules, 1933.

The seven figures numbers shown in the right hand side are those given to the application on acceptance of the complete specifications and under which the specifications will printed and subsequent proceeding will be taken.

The complete specifications of the accepted applications are open to the public inspection at this office at any time on all working days, if required typed copies of the specifications can be supplied by this office on payment of the prescribed charge which may be ascertained on application to this office.

The priority dates of the applications and the names of the countries in which the application to have been filed first are shown in the crescent brackets. The priority dates are claimed Under Section 78A of the Patents and Designs Act, 1911/ provisions under this Paris Convention.

- 255/2015 BASF SE, A company incorporated under the laws of Germany, (whose legal address is 67056 Ludwigshafen, Germany) Priority: EP 14187492.5 Dated: 02-10-2014
- Process for purifying astaxanthin and canthaxanthin.
IPC: C 07C 403/24
1005866
- Abstract:** The present invention relates to a process for purifying the xanthophylls astaxanthin and canthaxanthin. The process comprises suspending the xanthophyll in an organic solvent or solvent mixture, treating the suspension of the xanthophyll in the organic solvent or solvent mixture at elevated temperature, and subsequent separation off of the xanthophyll from the solvent by a solid-liquid separation, wherein the organic solvent is selected from ketones of the general formula (I) and mixtures of ketones of the general formula (I) where R1 is C1-C4 alkyl and R2 is selected from C1-C6 alkyl, C3-C8 cycloalkyl, phenyl and benzyl, wherein the phenyl rings in the two last-mentioned radicals are unsubstituted or can have 1 or 2 methyl groups, or R1 and R2 together are linear C4-C6 alkylene, which can bear 1, 2 or 3 methyl groups as substituents.
- 257/2015 Mahin Bin Mazher, Nationality: Bangladeshi, (whose legal address is House# 34, Road# 12, Block# K, Baridhara Diplomatic zone, Gulshan, Dhaka-1212, Bangladesh) Priority:
- HIGH ABRASION RESISTANCE STONE SHIELD PORCELAIN TILE AND PRODUCTION METHOD THEREOF.
IPC: C 04B 35/52
1005868
- Abstract:** The stone shield glaze formulation is a complex matrix of various materials like Glaze Compound A (FLL -22) >45-55% by weight and Glaze compound B (XG 145) >10-20% by weight and some other ingredients with fixed proportions. The result is a stronger tile that provides more longevity stone shield porcelain tiles that adhere up to 3,00,000 steps.
- 259/2015 HSIL LIMITED, a corporation organized and existing under the laws of India, (whose legal address is 2, RED CROSS PLACE, KOLKATA – 700001, WEST BENGAL, India) Priority: DE 102014018155.3 Dated: 10-12-2014
- TAMPER EVIDENT CLOSURE FOR AN ACCESS OPENING IN A CONTAINER, IN PARTICULAR A BOTTLE.
IPC: B 65D 41/00
1005872
- Abstract:** A tamper evident closure for an access opening in a container, in particular a bottle, has a closure part which is placeable onto the access opening in a sealing manner and has a bottom sleeve portion and an upper cover portion, which are connected in one piece to each other via a first tamper evident indicator. Furthermore, a hood-like indicator cap is provided which forms a second tamper evident indicator and at least partially surrounds at least the cover portion of the closure part, wherein access to the first tamper evident indicator is possible only when the indicator cap is destroyed. A tear off tab is formed in the indicator cap, which tear off tab is bounded by two grooves which are arranged at a distance and end at a distance from the bottom rim of the indicator cap, wherein at least one of the grooves is assigned a breaking point which extends as far as the bottom rim of the indicator cap.

- 277/2015 AB Enzymes Oy, a company organized and existing under the laws of Finland, (whose legal address is Tykkimäentie 15b, FI-05200 Rajamäki, Finland) Priority: FI 20145941 Dated: 27-10-2014 Fungal endoglucanase variants, their production and use.
IPC: C 11D 3/386, C 12N 15/62, 9/42,
1005876
Abstract: The invention relates to novel variants of fungal endoglucanases, their production and means for their production. Especially the invention relates to variants of *Acremonium thermophilum* Cel45A. The invention further relates to enzyme preparations and detergent compositions comprising at least one novel variant endoglucanase as well as to processes for treating cellulosic material therewith. The novel variant endoglucanase polypeptide-shave improved performance in textile applications, especially in biofinishing and biostoning, and in detergent applications, in fabric care and color maintenance, especially in prevention and removal of fuzz and pills, in color care and revival.
- 286/2015 LUBRIZOL ADVANCED MATERIALS, INC., A US Corporation, Incorporated in the State of Ohio (whose legal address is 9911 Brecksville Road, Cleveland, Ohio 44141-3241, United States of America) Priority: US 62/083, 331 Dated: 24/11/2014 A COUPLED URACIL COMPOUND FOR VINYL CHLORIDE POLYMER RESINS.
IPC: C 08K 5/342
1005875
Abstract: The disclosed technology relates to a novel coupled 6-amino uracil derivative, and the use of the coupled 6-amino uracil derivative as a stabilizer in halogen containing polymer compounds. In particular, the disclosed technology relates to the use of a coupled 6-amino uracil derivative as a stabilizer in vinyl chloride compounds, such as, for example, chlorinated polyvinyl chloride (CPVC) compounds.
- 288/2015 LONATI S.P.A, a Joint Stock company of (whose legal address is Via Francesco Lonati, 3 25124 BRESCIA, Italy) Priority: IT MI2014A002101 Dated: 09-12-2014 FOOTING FOR CIRCULAR KNITTING MACHINES FOR HOSIERY OR THE LIKE.
IPC: D 04B 9/00
1005880
Abstract: A footing for circular knitting machines for hosiery or the like, comprising a supporting structure (2) that comprises: – uprights (3) that are extended along substantially vertical directions; – at least one tubular reinforcement element (4), which is connected rigidly to the uprights (3) and mutually connects the uprights (3).
- 289/2015 Telefonaktiebolaget LM Ericsson (Publ), a Swedish company of (whose legal address is SE-164 83 Stockholm, Sweden) Priority: US 62/080, 877 Dated: 17-11-2014 CHANNEL ACCESS IN LISTEN BEFORE TALK SYSTEMS.
IPC: H 04W 72/0
1005874
Abstract: Systems and methods relating to Listen before Talk (LBT) procedures suitable for, e.g., License Assisted Access (LAA) to an unlicensed frequency spectrum or Long Term Evolution Unlicensed (LTE-U) are disclosed. In some embodiments, a method of operation of a node of a cellular communications network comprises performing a LBT procedure for an observed channel in an unlicensed frequency spectrum. The LBT procedure defers at least one Clear Channel Assessment (CCA) slot such that the LBT procedure concludes at or near a desired starting point for a transmission. The at least one CCA slot comprises at least one of a first CCA slot of the LBT procedure, one or more intermediate CCA slots of the LBT procedure, and a final CCA slot of the LBT procedure. The method further comprises performing the transmission on the observed channel upon completion of the LBT procedure.

Priority: RU 2014150427
Dated: 12-12-2014
IPC: F 28B 1/02
1005898
Abstract: This invention relates to electric power industry, and more particularly to horizontal steam generators for nuclear power plants with a water-cooled water-moderated power reactor (VVER) and to reactor plants with a VVER reactor and a horizontal steam generator. A reactor plant with a VVER reactor and a horizontal steam generator, including a nuclear reactor with four circulation loops, each comprising a steam generator with a horizontal bundle of heat-exchange tubes divided into banks by means of intertubular tunnels and connected to primary circuit coolant headers inside a cylindrical pressure vessel with elliptical bottoms, a reactor coolant pump, and a primary circuit coolant main circulation pipeline. Pressure vessel bore D_{vess} , distance S between the centerlines of the primary circuit coolant headers in the transverse direction and

steam generator length L_v along the inner surfaces of the elliptical bottoms have been respectively selected based on the following ratios: where: D is the rated steam generator capacity, t/h; N_{tb} is the number of steam generator vessel heat-exchange tubes, pcs.; S_v , S_h is the spacing between heat-exchange tubes in vertical and horizontal rows of heat-exchange bundle, respectively, mm; k is the arrangement identifier of heat-exchange tube bundle in a bank; H is the steam generator vessel tube filling height, mm; D_{head} is the primary circuit header outer diameter in the drilled area, mm; α is the heat-exchange tube central bend angle, deg.; B_1 и B_2 are the width of the heat-exchange tube central tunnel and the width of the heat-exchange tube tunnel opposite to the coolant header, respectively, mm; S_{head} is the heat-exchange tube circumferential spacing on the outer surface of the coolant header, mm; H_{hes} is the steam generator heat-exchange surface area, m²; d is the outer heat-exchange tube diameter, mm; r is the distance from the outer heat-exchange bundle tube to the steam generator bottom inner surface along the longitudinal steam generator axis, mm; wherein heat-exchange tube bend angle and distance have been selected from the following ranges:

Steam generator coolant header with U-shaped tubes of a horizontal heat-exchange bundle and methods of its manufacture.

IPC: F 22B 1/02, F 28F 1/00

1005899

Abstract: This invention relates to electric power industry, and can be used in horizontal steam generators for nuclear power plants with a water-water energetic reactor. We claim a steam generator primary circuit coolant header with U-shaped tubes of a horizontal heat-exchange bundle designed as a thick-wall welded vessel with a perforated central cylindrical part designed so as to allow installation and fastening of a U-shaped heat-exchange tube bundle in this part, wherein the tubes are grouped into banks and separated by vertical intertubular tunnels, a lower cylindrical part designed so as to allow welded connection with the steam generator vessel connection pipe, and an upper cylindrical part with a conical adapter to the flange connection of the manhole with a lid, wherein primary circuit header outer diameter D_{head} in the central part is selected based on the following ratio: where: S_h is the spacing between heat-exchange tubes in the horizontal heat-exchange bundle row, mm, B_2 is the width of the heat-exchange bundle tunnel opposite to the coolant header, mm, d is the outer heat-exchange tube diameter, mm, n_1 and n_2 indicate the number of tubes in the horizontal row of the smaller and bigger heat-exchange tube banks, accordingly, mm, R_b is the minimum bend radius of the heat-exchange bundle tubes, mm. The holes for fastening of heat-exchange tubes are staggered in the central cylinder part of the header so that the distance between edges of the adjacent holes is not less than 5.5 mm along the inner surface of the header. The technical result of the invention involves assurance of strength of the header wall bridges between holes for fastening of heat-exchange tubes and leaktightness of heat exchange tube connections with the header assuming that the outer surface of the perforated header part is more efficiently (fully) used for tubing.

 1005900

 Abstract: The invention relates to steam generators for VVER nuclear power plants. We claim a steam generator with a horizontal heat-exchange tube bundle comprising a welded cylinder vessel manufactured of steel shells and equipped with at least one feed water supply connection pipe and one steam removal connection pipe, and two elliptical bottoms, vessel internals, inlet and outlet headers connected to the heat-exchange tube bundle forming a heat-exchange surface of the steamgenerator, wherein inner diameter d_{vess} of the steam generator vessel is selected based on the following relations: where: d_{vess} is the inner diameter of the steam generator vessel, mm, D is the rated steam generator capacity, t/h, N_{tb} is the number of heat-exchange tubes in a bundle located in the vessel, pcs., S_v, S_h is the spacing between heat-exchange tubes in vertical and horizontal rows of heat-exchange bundle, respectively, mm, is the arrangement identifier of heat-exchange tubes in a bundle for in-line arrangement and for staggered arrangement), H is the steam generator vessel tube filling height, The steam generator vessel is filled with heat-exchange bundle tubes from the bottom upwards to the height of three quarters of its inner diameter or less, the remaining space in the top part of steam generator vessel is left for steam drying. The technical result is creation of a steam generator with a decreased specific amount of metal per structure wherein the generated steam is dried in one vessel with the heat-exchange surface.</p> |

 <i>IPC:</i> F 22B 1/02, F 28D 7/00

 1005901

 Abstract: This invention relates to steam generators, and more particularly to horizontal steam generators for nuclear power plants with a water-water energetic reactor (VVER). We claim a horizontal nuclear power plant steam generator comprising a cylindrical vessel, two elliptical bottoms, at least one feed water supply and steam removal connection pipe, an inlet header and an outlet header, a heat-exchange tube bundle connected to the same, wherein number N_{tb} of heat-exchange tubes in the bundle is selected depending on outer diameter d_{tb} of the heat exchange tubes as follows: and the gap between the adjacent heat-exchange tubes in the vertical direction does not exceed the vertical spacing between the heat-exchange tubes in the bundle. The technical result of the invention is an increased heat transfer efficiency in the steam generator with a limited number and maximum length of heat exchange tubes, which allows to use tubes employed in the industry.</p> |

Water-Cooled Water-Moderated Nuclear Reactor Core Melt
Cooling and Confinement System.

IPC: G 21C 13/10, 9/016

1005892

Abstract: The invention relates to nuclear power industry, namely to systems providing safety of nuclear power plants (NPP), and can be used during severe accidents leading to reactor vessel and NPP containment failure. The melt cooling and confinement system includes a cone-shaped guide plate installed under the reactor vessel bottom, cantilever girder installed under the guide plate and supporting the same, core catcher installed under the cantilever girder and equipped with cooled cladding in form of a multi-layer vessel for protection of the external heat-exchange wall from dynamic, thermal and chemical impacts, and filler material for melt dilution inside the multi-layer vessel. The said multi-layer vessel contains external and internal metal walls with filler of poorly heat-conductive in relation to the wall material in between. Filler thickness h_{fil} shall meet the following requirement: $0.8h_{ext} < h_{fil} < 1.6h_{ext}$, where h_{ext} is vessel external wall thickness. The technical result of the invention is the increased efficiency of heat removal from the melt and improved structural reliability. 7 depending claims, 3 figures, 1 appendix.

- METHOD FOR PROVIDING SEMI-FINISHED TUBULAR MANUFACTURED ARTICLES TO BE CLOSED BY STITCHING AT AN AXIAL END THEREOF FOR THE PRODUCTION OF SOCKS, AND SEMI-FINISHED TUBULAR MANUFACTURED ARTICLE OBTAINED WITH THE METHOD.
IPC: D 04B 1/10, 1/26
1005865
- Abstract:** A method for providing semi-finished tubular manufactured articles to be closed by stitching at an axial end thereof for the production of socks, and a semi-finished tubular manufactured article obtained with the method. The present method comprises a step of providing the body of the tubular manufactured article and a step of providing an end portion of the tubular manufactured article which is intended to be removed during the subsequent stitching operation in order to close an axial end of the tubular manufactured article. The step of providing the end portion comprises:- a step of providing an intermediate band connected to the body of the manufactured article and thinner than the thickness at least of the rows of knitting of the body of the manufactured article which are

connected to the intermediate band;- a step of providing an end edge thicker than the thickness of the intermediate band. In the present method, the height of the intermediate band, proximate to the regions that constitute the lateral ends of the two flaps of the end portion to be overlapped in order to stitch the axial end to be closed of the tubular manufactured article, is lower than the height of the remaining part of the intermediate band.

13/2016 Telefonaktiebolaget LM Ericsson (Publ), a Swediah company of (whose legal address is SE-164 83 Stockholm, Sweden) Priority: EP PCT/EP2015/051337 Dated: 23-01-2015

METHOD AND SYSTEM FOR RESOURCE ALLOCATION TO A COMMUNICATION-DEVICE IN A WIRELESS NETWORK.

IPC: H 04W 72/12

1005885

Abstract: A control message (580) prospectively indicates a need of a communication device sending a data packet of a first class of data employing radio resources. The radio resources are reserved at least for the first class of data.

ADAPTIVE BEAMFORMING.

IPC: H 04B 7/06

1005878

Abstract: There is provided mechanisms for adaptive beamforming. A method is performed by a first network device. The method comprises acquiring beamforming information indicating spatial directions in which an identification signal is to be transmitted. The method comprises transmitting the identification signal in a transmission pattern using directional beams in the spatial directions towards second network devices. The identification signal is transmitted such that the identification signal occupies a larger portion of communications resources when transmitted in spatial directions with high second network device presence than in spatial directions with low second network device presence.

29/2016 UNILEVER PLC., a company registered in England and Wales under company no. 41424, (whose legal address is Unilever House, 100 Victoria Embankment. London, EC4Y ODY., LONDON, United Kingdom) Priority: EP15154490.5 Dated: 10-02-2015

A HARD SURFACE TREATMENT COMPOSITION.

IPC: C 11D 3/12, 3/16, 3/37

1005864

Abstract: The present invention is in the field of hard surface treatment compositions; and in particular relates to hard surface treatment compositions to render a substrate hydrophobic and also repellent to stains and soils. It is thought that by making said surfaces hydrophobic, these stain/soils can be prevented from adhering onto the surfaces, enabling easy removal from the surface. It is therefore an object of the present invention to prevent soiling of hard surfaces by rendering a surface hydrophobic by forming a protective layer over the hard surface. It has been found that a combination of silica, an aminosilane and a polydimethylsiloxane having a viscosity between and having a functional group selected from hydrogen, hydroxyl and epoxy group renders a surface hydrophobic by forming a protective layer over the hard surface and preventing soiling of the surface.

- 33/2016 STANDARD BRANDS (UK) COOKING STOVE.
 LIMITED, a British company,
 (whose legal address is 4 *IPC:* F 24B 1/00, 1/02, 1/182, 1/26
 Cleeve Court, Cleeve Road,
 Leatherhead, Surrey, KT22 **1005870**
 7SD, United Kingdom)
 Priority: GB1502824.4
 Dated: 19-02-2015
- Abstract:** The present invention relates to forced air cooking stoves, in particular, to efficient cooking stoves for use by the military, those undertaking general camping or other outdoor leisure pursuits, or by larger groups of people for entertaining or humanitarian purposes. The cooking stoves include a fan to aid combustion, and a collar to focus the exhaust gasses onto the cooking vessel. They are designed to make efficient use of any type of fuel, including biomass such as wood and solid fuel blocks. They are also designed to minimise the soot deposited on the cooking vessel.
- 37/2016 Morrison Textile Machinery APPARATUS AND METHOD FOR WASHING AN
 Company, a company ELONGATE TEXTILE ARTICLE.

METHOD AND APPARATUS FOR RECEIVING AND DISBURSING DONATION.

IPC: G 06Q 20/00

1005896

Abstract: A Zakat payment Card formulated in accordance with the principles of the present invention comprises a payment card equivalent in many practical respects to conventional debit, credit and ATM card. The Account holder can only use the card to pay Zakat. Therefore, this is conclusive for use by Islamic consumer. The card must solely be used to pay Zakat and any organization or individual permitted according to Shariah to receive Zakat can accept the payment using special Card Reading Device. A PIN number shall also be provided to withdraw cash with an intention to pay Zakat. Details of any cash withdrawn or payment made by the card shall appear on the bank statement of the account holder under the heading of Zakat. The Account holder can also be provided with a separate statement for Zakat expenditure. However the account holder must instruct the bank to allocate certain amount after calculating his Zakat. That will be regarded as the limit of the Zakat card. However the account holder can anytime reload the card by instructing the bank since the account holder is in the best position to know about his Zakat amount. This will enable the card holder to maintain a correct account of his Zakat. Furthermore Zakat card will give Zakat which is one of the pillars of Islam an individual identity. Zakat Card will remind the Muslims their holy duty of paying Zakat.

A System and method of User's Registration and Report
Generation for User's Voice Based Input through
Telecommunication Networks.

IPC: H 04M 11/00

1005887

Abstract: The invention discloses a system of user's registration and report generation for user's voice based input through telecommunication networks. It provides provide user audio guidance to record necessary information to register with some software included system. The system creates new user account and merges user account with new contact number. The registered users perform their personal, business and/or financial transactions with the account. The voice based input and the authenticated transactions performed by the users is stored, transcribed and transmitted to deliver the user report generated in a multiple configured system through IVR, Automatic Speech Recognition (ASR), data storage cloud, plurality of asterisk switch or like this, database cloud configured with multiple set of data node like Cassandra, Apache Spark Cluster, Rabbit MQ (Task Que) and analytic software systems.

 OVERRIDING BRANCH PREDICTORS, AND RELATED
 CIRCUITS, METHODS, AND COMPUTER-READABLE
 MEDIA.
- IPC: G 06F 9/38*
- 1005881**
- Abstract:** Speculative history forwarding in overriding branch predictors, and related circuits, methods, and computer-readable media are disclosed. In one aspect, a method for performing branch prediction of fetched instructions in a processor is provided. A first branch prediction of a conditional branch instruction is predicted based on a first branch prediction history, which is then updated based on the first branch prediction. The first branch prediction is forwarded to a second branch prediction history as a speculative prediction. A second branch prediction is predicted by a second branch predictor based on the second branch prediction history including the speculative prediction. The second branch prediction is compared to the speculative prediction, and, if different, the speculative prediction is overridden by updating the first branch prediction in the first branch prediction history and the speculative prediction in the second branch prediction history based on the second branch prediction.

- Exhaust process for the manufacture of highly having antimicrobial textiles.
IPC: B 01D 39/1607, D 06M 11/00, 15/03
1005904
- Abstract:** The invention relates to a method of manufacturing a textile material with antimicrobial compounds in such a manner to chemically bind or attach said compounds to the textile material, and to the treated textile material which performs as a disinfectant or sterilizer on its own. The treated textile material exhibits wash-durability and non-leaching properties. The process comprises an exhaust process cycle comprising the steps of treating the textile material using an exhaust process, wherein the liquor comprises one or more antimicrobial agents, and subjecting the treated textile material to a heat treatment. The invention further relates to a device for purifying water, which can operate based on gravity and without electricity.
